PLANT AND SOIL

Contents Volume 298 Nos. 1–2 September 2007

Commentary

Mediterranean annual grasses in western North America: kids in a candy store
J.B. Norton, T.A. Monaco and U. Norton 1–5

Regular Articles

Plant–soil relationships of the invasive annual grass *Taeniatherum caput-medusae*: a reciprocal transplant experiment
R.R. Blank and R. Sforza 7–19

Decomposition and sorption characterization of plant cuticles in soil
B. Chefetz 21–30

Stable isotope composition of water in desert plants
J.R. Gat, D. Yakir, G. Goodfriend, P. Fritz, P. Trimborn, J. Lipp, I. Gev, E. Adar and Y. Waisel 31–45

Interaction of endophytic diazotrophic bacteria and *Fusarium oxysporum* f. sp. *cubense* on plantlets of banana 'Maça'
O.B. Weber, C.R. Muniz, A.O. Vitor, F.C.O. Freire and V.M. Oliveira 47–56

Changes in antioxidant enzyme activity in the fine roots of black poplar (*Populus nigra* L.) and cottonwood (*Populus deltoides* Bartr. ex Marsch) in a heavy-metal-polluted environment
K. Stobrawa and G. Lorenc-Plucińska 57–68

Does low soil base saturation affect fine root properties of European beech (*Fagus sylvatica* L.)?
A.K. Richter, L. Walthert, E. Frossard and I. Brunner 69–79

A dynamic model for the combined effects of N, P and K fertilizers on yield and mineral composition; description and experimental test
K. Zhang, D.J. Greenwood, P.J. White and I.G. Burns 81–98

Copper uptake and phytotoxicity as assessed in situ for durum wheat (*Triticum turgidum durum* L.) cultivated in Cu-contaminated, former vineyard soils
A.M. Michaud, M.N. Bravin, M. Galleguillos and P. Hinsinger 99–111

Seed germination of agricultural weeds is promoted by the butenolide 3-methyl-2*H*-furo[2,3-*c*]pyran-2-one under laboratory and field conditions
J.C. Stevens, D.J. Merritt, G.R. Flematti, E.L. Ghisalberti and K.W. Dixon 113–124

Tree species and wood ash affect soil in Michigan's Upper Peninsula
F. Sartori, R. Lal, M.H. Ebinger and R.O. Miller 125–144

Comparing different approaches to calculate the effects of heterogeneous root distribution on nutrient uptake: a case study on subsoil nitrate uptake by a barley root system
M. Kohl, U. Böttcher and H. Kage 145–159

Long-term effects of continuous direct seeding mulch-based cropping systems on soil nitrogen supply in the Cerrado region of Brazil
A. Maltas, M. Corbeels, E. Scopel, R. Oliver, J.-M. Douzet, F.A.M. da Silva and J. Wery **161–173**

^{13}C isotopic discrimination: a starting point for new insights in competition for nitrogen and water under contour hedgerow systems in tropical mountainous regions
W. Pansak, G. Dercon, T. Hilger, T. Kongkaew and G. Cadisch **175–189**

Effects of grazing and soil micro-climate on decomposition rates in a spatio-temporally heterogeneous grassland
A.C. Risch, M.F. Jurgensen and D.A. Frank **191–201**

Growth of hybrid poplar as affected by dandelion and quackgrass competition
B.S. Kabba, J.D. Knight and K.C.J. Van Rees **203–217**

Arbuscular mycorrhiza of introduced and native grasses colonizing zinc wastes: implications for restoration practices
P. Ryszka and K. Turnau **219–229**

Toxicity in leaves of rice exposed to cadmium is due to hydrogen peroxide accumulation
Y.T. Hsu and C.H. Kao **231–241**

Early growth and nutritional response to resource competition in cocoa-shade intercropped systems
M.E. Isaac, F. Ulzen-Appiah, V.R. Timmer and S.J. Quashie-Sam **243–254**

Phytoextraction of Cd and Zn from agricultural soils by *Salix* ssp. and intercropping of *Salix caprea* and *Arabidopsis halleri*
G. Wieshammer, R. Unterbrunner, T.B. García, M.F. Zivkovic, M. Puschenreiter and W.W. Wenzel **255–264**

Short-range spatial variability of soil $\delta^{15}N$ natural abundance – effects on symbiotic N_2-fixation estimates in pea
L. Holdensen, H. Hauggaard-Nielsen and E.S. Jensen **265–272**

Mycorrhiza and soil bacteria influence extractable iron and manganese in soil and uptake by soybean
M.A. Nogueira, U. Nehls, R. Hampp, K. Poralla and E.J.B.N. Cardoso **273–284**
